

Flour Balloons

You will need:

- party balloons; heavy duty if possible
- flour
- funnel
- scissors

1. Stretch the balloon: Using your mouth or a pump blow air into the balloon so that it inflates and stretches. Let the air out of the balloon. Repeat a few times.

2. Using the funnel fill the balloon with flour. Make sure to be holding the end of the balloon tightly to avoid a mess. Stop putting flour in the balloon when it reaches the neck. Don't fill the neck. Make sure no air is trapped inside and then tie the end into a knot.

3. If preferred, take another balloon and cut the neck off. Stretch the second balloon over the first one as a second layer. The second layer will help prevent the dispersion of flour all over the place in the event a hole would appear.
